COURSE OVERVIEW

This intensive 2-hour Azure Identity Course Workshop, presented by Computer Pride, is meticulously designed for IT professionals seeking to master the fundamentals of identity and access management within the Microsoft Azure ecosystem. In today's cloud-first world, robust identity security is paramount for protecting organizational resources and data. This workshop provides a concise yet comprehensive dive into Azure Active Directory (Azure AD), the cornerstone of Microsoft's cloud identity platform, equipping you with essential skills to manage users, groups, devices, and secure authentication methods.

Participants will gain practical insights into implementing Multi-Factor Authentication (MFA), configuring Conditional Access policies to enforce granular security, and understanding the principles of identity protection. Through focused discussions and practical demonstrations, you will learn how to enhance your organization's security posture, streamline access management, and ensure compliance in a dynamic cloud environment. This workshop is your stepping stone towards becoming proficient in managing modern cloud identities, making you an invaluable asset in any organization leveraging Azure services.

Duration	2 hours
Level	Intermediate
Vendor	Microsoft

COURSE CURRICULUM

01 Understanding Azure Active Directory Fundamentals

- Introduction to Azure AD vs. On-premises AD
- Azure AD Tenants, Subscriptions, and Directories
- Core components and services of Azure AD

02 User, Group, and Device Management

- Creating and managing users and groups
- Implementing administrative units
- Registering and joining devices to Azure AD

03 Implementing Secure Authentication

- Configuring Multi-Factor Authentication (MFA)
- Understanding passwordless authentication options (e.g., FIDO2, Windows Hello for Business)
- Password policies and self-service password reset

04 Enforcing Access with Conditional Access Policies

- Introduction to Conditional Access framework
- Designing and implementing Conditional Access policies
- Using session controls and access grants

05 Introduction to Azure AD Identity Protection

- Detecting risky users and sign-ins
- Configuring risk policies
- Reviewing audit and sign-in logs

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Junior Cloud Administrator (Azure Focus)**
- > **Identity and Access Management (IAM) Specialist**
- > **IT Security Analyst (Cloud Operations)**

FREQUENTLY ASKED QUESTIONS

Q: What foundational knowledge or prerequisites are recommended before attending this Azure Identity Course Workshop?

While this is an intermediate workshop, attendees will benefit most if they have a basic understanding of general IT networking concepts, fundamental Windows Server Active Directory principles, and some exposure to cloud computing concepts, ideally with Microsoft Azure. This workshop is designed to build upon that basic familiarity to quickly get you up to speed on Azure-specific identity management.

Q: How will the skills learned in this 2-hour workshop directly contribute to securing my organization's cloud environment?

This workshop is highly practical, focusing on immediate application. You'll learn to implement critical security features like Multi-Factor Authentication (MFA) and design Conditional Access policies. These skills are directly transferable, enabling you to significantly reduce the risk of unauthorized access, enforce compliance, and protect sensitive organizational data and resources hosted within Azure, thereby strengthening your overall cloud security posture.

Q: Is this workshop suitable for individuals preparing for Microsoft Azure identity-related certifications, and what would be the next steps?

Yes, this workshop provides an excellent foundational understanding of core Azure Identity concepts crucial for certifications such as the AZ-104 (Azure Administrator Associate) or specifically the AZ-500 (Azure Security Technologies). While not a full certification prep course, it covers key identity management domains. After this workshop, you would typically delve deeper into advanced topics like hybrid identity, identity governance, and more complex Conditional Access scenarios, potentially through our longer certification courses.

ABOUT COMPUTER PRIDE

East Africa's Premier IT Training Center

With over 15 years of excellence, Computer Pride delivers globally recognized certification programs from leading technology vendors. Located on Kenyatta Avenue in Nairobi's CBD, our state-of-the-art facilities and expert instructors have empowered thousands of professionals across East Africa.
