## COURSE CURRICULUM

### 01 Module 1: Centos 8 System Boot & Package Management Quizzes

- GRUB2 Bootloader & System Initialization
- Systemd Services and Targets
- RPM and YUM/DNF Package Management
- Software Repositories Configuration

### 02 Module 2: User, Group & File System Management Quizzes

- User and Group Administration
- File Permissions (rwx, SUID, SGID, Sticky Bit)
- Logical Volume Management (LVM)
- Mounting and Unmounting File Systems

### 03 Module 3: Network Configuration & Services Quizzes

- Network Interface Configuration (nmcli, ip)
- FirewallD Configuration
- DNS Client Configuration
- NTP Synchronization

### 04 Module 4: Security & Troubleshooting Fundamentals Quizzes

- SELinux Modes and Contexts
- SSH Key-based Authentication
- Log File Analysis (journalctl)
- Process Management and Troubleshooting

### 05 Module 5: Advanced Administration Concepts Quizzes

- Crontab and Scheduled Tasks
- Kernel Parameters and Tuning
- Storage Quotas Implementation
- Network File System (NFS) Basics

## CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Junior Linux System Administrator (Knowledge Validation)**
- > **IT Support Specialist (Linux Environments)**
- > **DevOps Associate (Foundational OS Knowledge)**

## FREQUENTLY ASKED QUESTIONS

**Q: How does this 'Quiz Questions Answers' course differ from a full Centos 8 administration training program?**

This 2-hour course focuses specifically on providing a comprehensive set of quiz questions and detailed answers related to Centos 8 Linux administration. It is designed to test and reinforce existing knowledge, identify areas for improvement, and serve as an excellent review tool. It does not include hands-on labs or in-depth instructional lectures that a full administration course would offer, making it ideal for self-assessment and exam preparation rather than initial learning.

**Q: What prior experience or knowledge is recommended to get the most out of these Centos 8 administration quizzes?**

To fully benefit from this course, it is highly recommended that participants have prior foundational knowledge of Linux command-line operations and basic Centos 8 system administration concepts. This includes familiarity with user and group management, file system operations, basic networking, and package management. While the answers provide explanations, the course assumes some pre-existing understanding of the topics.

**Q: Can this course help me prepare for a specific Linux certification, such as the RHCSA (Red Hat Certified System Administrator) exam?**

While this course is not a direct RHCSA preparation program, the Centos 8 Linux Administration Quiz Questions Answers course covers many core objectives found in general Linux administration certifications like the RHCSA, given Centos's close relation to RHEL. By thoroughly reviewing these quizzes, you can strengthen your understanding of key topics and improve your readiness for the conceptual and practical challenges presented in such certification exams. It serves as an excellent supplemental study tool.

## ABOUT COMPUTER PRIDE

*East Africa's Premier IT Training Center*

With over 15 years of excellence, Computer Pride delivers globally recognized certification programs from leading technology vendors. Located on Kenyatta Avenue in Nairobi's CBD, our state-of-the-art facilities and expert instructors have empowered thousands of professionals across East Africa.
