COURSE OVERVIEW

This intermediate-level "Clarity Project Management" course, designed for IT professionals and project managers, delves into the powerful capabilities of Broadcom Clarity PPM (Project and Portfolio Management) software. Leveraging a blend of PMI's globally recognized project management principles and hands-on application of Clarity PPM, this course equips participants with the essential skills to effectively manage complex projects, programs, and entire portfolios. You will learn to streamline project lifecycle management, from strategic planning and resource allocation to execution, monitoring, and reporting, all within the integrated Clarity PPM environment.

The curriculum is meticulously structured to provide a comprehensive understanding of Clarity PPM's core functionalities, including demand management, project scheduling, resource optimization, financial tracking, and performance analytics. By mastering this enterprise-grade solution, participants will enhance their ability to align projects with organizational strategy, make data-driven decisions, improve operational efficiency, and drive successful project outcomes. This specialized training bridges the gap between theoretical project management knowledge and practical application using a leading industry tool.

Completing this course will not only deepen your technical proficiency with Clarity PPM but also bolster your strategic thinking in project and portfolio management. It empowers you to become a key asset in organizations striving for greater project predictability, resource utilization, and overall business value.

Duration	32 Hours
Level	Intermediate
Vendor	PMI

- Implementing Best Practices for Clarity PPM Adoption

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Clarity PPM Administrator/Specialist**
- > **Enterprise Portfolio Manager**
- > **Senior Project and Program Manager with PPM Expertise**

FREQUENTLY ASKED QUESTIONS

Q: What specific skills will I gain that differentiate me from other project managers?

This course specifically trains you in the practical application of Broadcom Clarity PPM, a leading enterprise solution for project and portfolio management. You will gain hands-on proficiency in strategic planning, demand management, resource optimization, detailed financial tracking, and executive-level reporting within a dedicated PPM tool. This goes beyond general project management theory, providing you with a highly sought-after technical skill to drive organizational project success and strategic alignment.

Q: Is prior experience with project management software required before enrolling in this Clarity Project Management course?

While prior exposure to project management methodologies (e.g., from a PMP or CAPM certification) would be beneficial, it is not strictly required. This intermediate course is designed to introduce both the principles of project and portfolio management as applied within the Clarity PPM environment. Basic understanding of project lifecycle concepts will be helpful, but the course will guide you through the specifics of using Clarity PPM as the primary tool.

Q: How will mastering Clarity PPM enhance my career trajectory, especially in a leadership role?

Mastering Clarity PPM positions you as a strategic asset capable of driving organizational efficiency and achieving business objectives through optimized project and portfolio management. For leadership roles, it means you can effectively manage an entire portfolio of investments, conduct 'what-if' scenario planning, align projects with corporate strategy, optimize resource utilization across departments, and provide data-driven insights to executive stakeholders. This directly translates to improved decision-making, reduced project failures, and a clear pathway to roles like Portfolio Manager or Head of PMO.
