COURSE OVERVIEW

This course, "Developing Microsoft SharePoint Server 2016 Solutions Quiz Questions Answers," serves as an essential resource for IT professionals and developers aiming to solidify their understanding and expertise in building robust, scalable solutions for SharePoint Server 2016. It meticulously covers the core competencies required for developing custom solutions, web parts, event receivers, workflows, and advanced business connectivity services (BCS) integrations within the SharePoint 2016 environment. Participants will gain deep insights into the architecture, extensibility points, and best practices for creating powerful collaborative platforms. By engaging with the detailed quiz questions and comprehensive answers provided, learners will not only reinforce their theoretical knowledge but also learn practical application scenarios crucial for real-world development challenges. This focused approach is designed to enhance problem-solving skills, optimize solution design, and prepare individuals for advanced roles in SharePoint development and administration. The benefits extend to increased efficiency in project delivery, improved solution quality, and a significant boost in career opportunities within organizations leveraging SharePoint 2016 for their digital workplaces.

Duration	2 hours
Level	Intermediate
Vendor	Microsoft

COURSE CURRICULUM

01 Module 1: SharePoint Solution Development Fundamentals

- SharePoint 2016 Architecture Overview for Developers
- Understanding the SharePoint Add-in Model
- Developing SharePoint Hosted Add-ins
- Working with Provider-Hosted Add-ins

02 Module 2: Customizing SharePoint User Experience

- Creating Custom Web Parts
- Developing UI Extensions and Branding
- Implementing Custom Master Pages and Page Layouts
- Utilizing Client-Side Object Model (CSOM) and REST API

03 Module 3: Data Management and Business Integration

- Working with SharePoint Lists and Libraries Programmatically
- Implementing Event Receivers and Workflows
- Developing Business Connectivity Services (BCS) Solutions
- Integrating External Data Sources

04 Module 4: Advanced SharePoint Development Concepts

- Building Custom Search Solutions
- Developing Enterprise Content Management (ECM) Solutions
- Implementing User Profile Service Applications
- Optimizing SharePoint Solutions for Performance

05 Module 5: Troubleshooting and Deployment

- Debugging SharePoint Solutions
- Packaging and Deploying SharePoint Add-ins and Solutions
- Monitoring and Logging SharePoint Development Artefacts

- Best Practices for SharePoint Solution Lifecycle Management

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **SharePoint Solutions Developer**
- > **Enterprise Content Management (ECM) Specialist**
- > **Collaborative Solutions Architect**

FREQUENTLY ASKED QUESTIONS

Q: How does the "Quiz Questions Answers" format specifically prepare me for developing real-world SharePoint 2016 solutions?

This course is designed to simulate the types of challenges and architectural considerations encountered in actual SharePoint 2016 development projects. By presenting scenario-based quiz questions and detailed answers, you'll learn to analyze problems, apply appropriate SharePoint development models and APIs (like CSOM, REST, Add-ins), and understand best practices for building robust and scalable solutions, directly translating into practical development skills.

Q: What are the recommended prerequisites for taking this course to maximize my learning experience?

To get the most out of "Developing Microsoft SharePoint Server 2016 Solutions Quiz Questions Answers," a foundational understanding of C# and .NET development is highly recommended, along with basic knowledge of web technologies such as HTML, CSS, and JavaScript. Familiarity with the SharePoint 2016 platform from an end-user or administrator perspective would also be beneficial, as this course dives deep into solution development rather than foundational SharePoint usage.

Q: Beyond the quiz format, what specific development skills will I gain that are crucial for a SharePoint Solutions Developer role?

Through this course, you will hone critical skills such as developing custom SharePoint Add-ins (SharePoint-hosted and Provider-hosted), programmatically interacting with SharePoint data using CSOM and REST APIs, creating custom web parts and UI elements, integrating external systems via Business Connectivity Services (BCS), and implementing event receivers and custom workflows. These competencies are fundamental for designing, building, and deploying professional-grade SharePoint 2016 solutions.
