COURSE OVERVIEW

The DW-300: Microsoft Purview Deployment Workshop is an intermediate-level, hands-on training designed for IT professionals aiming to master Microsoft Purview for comprehensive data governance and compliance. This intensive 2-hour workshop delves into the core functionalities of Microsoft Purview, empowering participants to effectively map their data landscape, manage data lifecycles, and enforce critical compliance policies across hybrid and multi-cloud environments. You will learn to leverage Purview's unified data governance solution, covering aspects from data discovery and classification to data loss prevention and eDiscovery, ensuring your organization meets stringent regulatory requirements. This workshop provides practical insights and actionable strategies for deploying and configuring Microsoft Purview to address modern data challenges. Participants will gain proficiency in establishing a robust data estate, enhancing data visibility, and protecting sensitive information. By understanding Purview's integration with other Microsoft 365 services, you'll be well-prepared to implement a proactive data protection strategy, mitigate risks, and streamline compliance operations, ultimately contributing to your organization's data security posture and regulatory adherence.

Duration	2 hours
Level	Intermediate
Vendor	Microsoft
Exam Code	DW-300

COURSE CURRICULUM

01 Module 1: Introduction to Microsoft Purview & Data Governance Fundamentals

- Understanding the Microsoft Purview unified data governance solution
- Core components and capabilities of Purview (Data Map, Data Catalog, Information Protection, Compliance Manager)
- Key data governance concepts and their importance in modern enterprises
- Overview of regulatory compliance (GDPR, CCPA, HIPAA) and how Purview helps

02 Module 2: Planning & Initial Deployment of Microsoft Purview

- Assessing your data estate and defining governance requirements
- Planning Purview architecture and deployment strategy
- Setting up the Microsoft Purview account and accessing the governance portal
- Registering and scanning data sources (Azure, AWS, on-premises)

03 Module 3: Deep Dive into Purview Data Map & Information Protection

- Creating and managing the Purview Data Map for data discovery
- Leveraging the Data Catalog for data classification, labeling, and business glossary
- Implementing sensitivity labels and policies for data protection
- Configuring Data Loss Prevention (DLP) policies within Purview

04 Module 4: Purview for Compliance, eDiscovery & Monitoring

- Utilizing Purview's eDiscovery capabilities for legal and investigative holds
- Integrating with Compliance Manager for risk assessment and control implementation
- Monitoring Purview health and governance activities
- Best practices for ongoing Purview management and optimization

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Data Governance Specialist**
- > **Microsoft 365 Compliance Administrator**
- > **Information Protection Engineer**

FREQUENTLY ASKED QUESTIONS

Q: What specific data governance challenges will I be equipped to solve after completing this DW-300 workshop?

Upon completing this workshop, you will be proficient in tackling challenges such as fragmented data visibility, ensuring compliance with evolving data regulations, preventing data loss across various platforms, and efficiently managing data lifecycles. You will gain the practical skills to implement Purview solutions that centralize data discovery, enforce data classification, and streamline compliance operations, significantly improving your organization's data security posture.

Q: What foundational knowledge or prerequisites are recommended to maximize my learning in this DW-300: Microsoft Purview Deployment Workshop?

To get the most out of this workshop, participants should have a basic understanding of Microsoft Azure services, particularly storage accounts and identity management, along with familiarity with Microsoft 365 compliance features. Prior exposure to data governance concepts or data management practices is beneficial, though not strictly required, as the workshop will cover Purview fundamentals.

Q: How does this DW-300 workshop prepare me for implementing advanced data loss prevention (DLP) policies within Microsoft Purview?

This workshop provides a strong foundation in designing and deploying advanced DLP policies by covering the integration of sensitivity labels, data classification, and policy configuration within Microsoft Purview. You will learn to identify sensitive information types, create custom DLP rules, and apply them across diverse data sources, empowering you to proactively prevent data breaches and ensure regulatory compliance.
