COURSE OVERVIEW

In this course, you will learn how to use the most common FortiGate features.

In interactive labs, you will explore firewall policies, user authentication, high availability, logging and monitoring, site-to-site IPsec VPN, FortiGate in Cloud, FortiSASE, and how to protect your network using security profiles, such as IPS, antivirus, web filtering, application control, and more. These administration fundamentals will provide you with a solid understanding of how to implement the most common FortiGate features.

Duration	24 Hours
Level	Intermediate
Vendor	Fortinet

WHO IS THIS FOR?

- Networking and security professionals involved in the management, configuration, administration, and monitoring of FortiGate devices used to secure their organizations' networks should attend this course.
- You should have a thorough understanding of all the topics covered in the FortiGate Operator course before attending the FortiOS Administrator course.

PREREQUISITES

- Knowledge of network protocols
- Basic understanding of firewall concepts

COURSE CURRICULUM
