COURSE OVERVIEW

This intermediate-level course, "Implement Manage Microsoft Intune Windows 11," provides IT professionals with the essential skills to effectively deploy, manage, and secure Windows 11 devices within a modern cloud-first environment. Leveraging Microsoft Intune, the course delves into core technologies for endpoint management, compliance, and application deployment, ensuring that participants can streamline IT operations and enhance organizational security. You will learn to navigate the Intune portal, configure device enrollment, establish robust security policies, and deploy essential applications, all tailored for the Windows 11 operating system.

Participants will gain a deep understanding of how to leverage Intune's capabilities to support hybrid work models, enforce compliance standards, and provide a seamless user experience across a diverse range of devices. By mastering the integration of Intune with Windows 11, you will be equipped to tackle modern IT challenges, reduce administrative overhead, and ensure that your organization's endpoints are secure, up-to-date, and optimally configured. This certification is crucial for IT administrators looking to modernize their device management strategies and achieve greater operational efficiency and security compliance.

Duration	2 hours
Level	Intermediate
Vendor	Microsoft

COURSE CURRICULUM

- 01 Module 1: Introduction to Microsoft Intune and Windows 11 Management**
 - Overview of Microsoft Intune's role in the modern workplace
 - Understanding Windows 11 device management challenges
 - Intune architecture and key components
 - Planning your Intune deployment for Windows 11
- 02 Module 2: Windows 11 Device Enrollment and Configuration**
 - Configuring device enrollment methods (AutoPilot, BYOD, Corporate Owned)
 - Creating and assigning device compliance policies for Windows 11
 - Managing user and device profiles
 - Introduction to configuration profiles
- 03 Module 3: Policy Management and Security for Windows 11**
 - Implementing Windows 11 configuration profiles (device restrictions, features)
 - Deploying endpoint security policies (Antivirus, Firewall, Disk Encryption)
 - Utilizing Security Baselines for Windows 11
 - Integrating Conditional Access for secure Windows 11 access
- 04 Module 4: Application Deployment and Updates**
 - Deploying Line-of-Business (LOB) applications
 - Managing Microsoft Store apps and Win32 app deployment
 - Configuring Windows 11 update rings and feature updates via Intune
 - Introduction to Application Protection Policies (MAM)
- 05 Module 5: Monitoring, Reporting, and Troubleshooting Windows 11 in Intune**

- Utilizing Intune reports and analytics for Windows 11 devices
- Monitoring device health, compliance, and update status
- Performing remote actions (wipe, retire, restart)
- Common troubleshooting scenarios for Intune-managed Windows 11 devices

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Modern Workplace Administrator**
- > **Endpoint Security Engineer**
- > **Microsoft 365 Device Management Specialist**

FREQUENTLY ASKED QUESTIONS

Q: What are the recommended prerequisites for taking the 'Implement Manage Microsoft Intune Windows 11' course?

While there are no strict official prerequisites, a foundational understanding of Windows operating systems, basic networking concepts, and familiarity with Microsoft 365 services (like Azure Active Directory) will be highly beneficial for maximizing your learning in this intermediate-level course.

Q: What practical, hands-on skills will I acquire that are directly applicable to managing Windows 11 endpoints in an enterprise environment?

Upon completion, you will be proficient in enrolling Windows 11 devices, deploying critical security policies and configuration profiles, managing application lifecycles (including Win32 apps), and orchestrating Windows 11 updates directly through Microsoft Intune. You'll gain practical experience in streamlining endpoint management, enhancing security posture, and troubleshooting common device issues.

Q: How does mastering Intune for Windows 11 specifically enhance my career prospects as a Modern Workplace Administrator or Endpoint Specialist?

This course directly addresses the critical skills needed for modern IT roles focused on endpoint management. You will be uniquely positioned to drive digital transformation initiatives, ensure regulatory compliance, and secure organizational data on Windows 11 devices, making you an invaluable asset for companies transitioning to cloud-managed environments and supporting hybrid workforces.
