COURSE OVERVIEW

This intermediate-level course, "Installation And Configuration In Microsoft Dynamics Nav 2018 Quiz Questions Answers," is meticulously designed to solidify your understanding of the intricate processes involved in deploying and setting up Microsoft Dynamics NAV 2018. Through a focused, question-and-answer format, participants will delve into the core technologies and best practices required for a stable and efficient ERP environment. This program moves beyond theoretical knowledge, preparing you to tackle real-world configuration challenges and excel in technical assessments related to Dynamics NAV 2018.

The curriculum covers essential topics such as hardware and software prerequisites, SQL Server database setup, Microsoft Dynamics NAV Server component installation, various client deployments (Windows, Web, Universal App), and critical system configurations for security, user management, and performance optimization. By mastering the detailed answers to comprehensive quiz questions, you will gain a profound conceptual understanding of the system's architecture and operational requirements.

The professional benefits of this course are substantial. It equips IT professionals, system administrators, and technical consultants with the precise knowledge needed to confidently install, configure, troubleshoot, and maintain Microsoft Dynamics NAV 2018. This specialized expertise enhances your ability to ensure optimal system performance, minimize downtime, and effectively support business operations, thereby boosting your career trajectory in the competitive ERP solutions landscape.

Duration	2 Hours
Level	Intermediate
Vendor	Microsoft

COURSE CURRICULUM

01 Module 1: Dynamics NAV 2018 Architecture and Prerequisites

- Understanding Dynamics NAV 2018 Components
- Hardware and Software Requirements for Installation
- SQL Server Database Preparation and Best Practices
- Network Configuration for Dynamics NAV Connectivity
- Licensing Concepts and Management

02 Module 2: Installing the Dynamics NAV Server

- Running the Microsoft Dynamics NAV 2018 Setup Wizard
- Configuring Dynamics NAV Service Tiers
- Managing Dynamics NAV Server Instances
- Understanding Multi-tenant Deployments
- Post-Installation Verification and Troubleshooting

03 Module 3: Database Management and Configuration

- Creating and Attaching Dynamics NAV Databases
- SQL Server Collation Settings for NAV
- Database Permissions and Security Considerations
- Backup, Restore, and Database Maintenance Strategies
- Database Synchronization and Upgrade Essentials (conceptual)

04 Module 4: Client Installations and Connectivity

- Installing and Configuring the Windows Client
- Setting Up the Web Client with Internet Information Services (IIS)
- Deploying and Connecting Universal App Clients
- Configuring Role-Tailored Client Features
- Remote Desktop Services (RDS) Integration for Client Access

05 Module 5: Security, Permissions, and Performance Configuration

- User Management and Authentication Methods (Windows, Database)
- Defining and Assigning Permissions Sets in NAV
- Implementing SSL/TLS Certificates for Secure Connections
- Basic Performance Monitoring and Tuning for NAV Server
- Configuring NAS (NAV Application Server) Services

06 Module 6: Advanced Configuration Topics and Troubleshooting

- Integrating Dynamics NAV with Microsoft Office Products
- Overview of Automation and Job Queues Configuration
- Common Installation and Configuration Error Scenarios
- Utilizing Event Viewer and Dynamics NAV Logs for Diagnostics
- Understanding Upgrade Toolkits and Data Migration (conceptual)

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Microsoft Dynamics NAV System Administrator**
- > **ERP Deployment Consultant (Microsoft Dynamics NAV focus)**
- > **Technical Support Specialist for Microsoft Dynamics 365 Business Central (transitioning from NAV)**

FREQUENTLY ASKED QUESTIONS

Q: What specific prior knowledge or prerequisites are recommended before undertaking this 'Installation and Configuration in Microsoft Dynamics NAV 2018 Quiz Questions Answers' course?

This intermediate-level course assumes a foundational understanding of Windows Server operating systems, basic SQL Server administration concepts, and a general familiarity with ERP system principles. While it is structured around quiz questions, prior exposure to Microsoft Dynamics NAV or similar business applications will significantly enhance your ability to grasp the nuanced technical details of installation and configuration.

Q: How does this quiz-focused course prepare me for real-world deployment challenges or official Microsoft certification exams related to Dynamics NAV 2018 installation?

This course is meticulously designed to solidify your theoretical and conceptual understanding of Dynamics NAV 2018 installation and configuration. By engaging with a comprehensive set of quiz questions and detailed answers, you will gain deep insights into best practices, common deployment scenarios, and critical configuration parameters. This rigorous review not only sharpens your problem-solving skills for real-world deployment and troubleshooting but also serves as an excellent preparation tool for relevant certification exams by highlighting key examinable areas and reinforcing core knowledge.

Q: Will this course cover advanced scenarios such as multi-tenant architecture setup or integration with other business intelligence tools for Dynamics NAV 2018?

While the course primarily focuses on core installation and configuration principles for standalone and typical Dynamics NAV 2018 environments, it does include subjects on multi-tenant deployment concepts within the context of quiz questions to ensure a broad understanding. Additionally, it covers foundational connectivity and security configurations that are prerequisites for any integration. However, deep dives into complex BI tool integrations or extensive customization beyond standard setup are outside the scope, as the main objective is to ensure thorough mastery of the system's foundational setup and configuration for conceptual understanding and exam readiness.

ABOUT COMPUTER PRIDE

East Africa's Premier IT Training Center

With over 15 years of excellence, Computer Pride delivers globally recognized certification programs from leading technology vendors. Located on Kenyatta Avenue in Nairobi's CBD, our state-of-the-art facilities and expert instructors have empowered thousands of professionals across East Africa.
