FREQUENTLY ASKED QUESTIONS

Q: How does this 'Is Project Management' course relate to official PMI certifications like CAPM or PMP?

This 'Is Project Management' course serves as an excellent foundational primer. It introduces the core concepts and PMI perspectives necessary to understand the project management landscape. While it does not fulfill the contact hour requirements for the CAPM or PMP certifications, it provides crucial conceptual clarity, familiarizes you with PMI terminology, and helps you determine if pursuing these more advanced certifications aligns with your career goals.

Q: What specific skills or knowledge will I gain from this 2-hour 'Is Project Management' course?

Upon completing this course, you will be able to clearly define what constitutes a project, articulate the fundamental phases of a project lifecycle, identify key project stakeholders, and understand the critical role of project management in achieving organizational objectives. You'll also gain an appreciation for the 'triple constraint' (scope, time, cost) and the foundational principles advocated by PMI, enabling you to communicate more effectively within project environments.

Q: Is there a prerequisite for taking the 'Is Project Management' course, or is it suitable for absolute beginners?

This 'Is Project Management' course is designed for a broad audience and has no formal prerequisites. It is perfectly suitable for absolute beginners who are curious about project management, as well as professionals in non-project management roles (e.g., functional managers, team leads, business analysts) who wish to better understand how projects operate within their organizations and effectively collaborate with project teams. A basic understanding of business operations is beneficial but not required.
