COURSE OVERVIEW

Unlock the power of digital transformation with our accelerated Microsoft Power Platform Certification Training Course, offered by Computer Pride. This intensive 2-hour program is designed for intermediate learners looking to quickly grasp the core capabilities of Microsoft Power Apps, Power Automate, Power BI, Power Virtual Agents, and Dataverse. You'll learn how to leverage this suite of low-code tools to build custom business applications, automate workflows, analyze data, and create intelligent virtual agents, driving efficiency and innovation within your organization. This course acts as a high-impact primer, equipping you with the foundational understanding and practical skills needed to begin your journey as a Power Platform professional or prepare for Microsoft's fundamental certifications. Upon completion, you will not only understand the interconnectedness of the Power Platform components but also gain the confidence to initiate the development of practical business solutions. The professional benefits are immense: you'll be able to streamline operations, reduce manual errors, and empower colleagues by creating intuitive tools and automated processes. This certification solidifies your ability to contribute to digital initiatives, making you an invaluable asset in any forward-thinking enterprise seeking to optimize its operations and foster a culture of innovation.

Duration	2 hours
Level	Intermediate
Vendor	Microsoft

COURSE CURRICULUM

01 Module 1: Understanding the Microsoft Power Platform Ecosystem

- What is Power Platform: Vision, Benefits, and Key Components
- Overview of Power Apps, Power Automate, Power BI, Power Virtual Agents, and Dataverse
- Common business use cases and scenarios for Power Platform solutions
- Introduction to Power Platform licensing models and security fundamentals

02 Module 2: Building Foundational Solutions with Power Apps & Power Automate

- Introduction to Power Apps: Canvas vs. Model-driven apps (key distinctions)
- Creating a simple Canvas App from a data source (e.g., SharePoint List)
- Introduction to Power Automate: Types of flows (Cloud, Desktop, Business Process)
- Building a basic automated cloud flow (e.g., email notification on new item creation)

03 Module 3: Dataverse Essentials & Power Platform Integration

- Understanding Dataverse as the core data platform for Power Platform
- Creating simple tables, columns, and relationships in Dataverse
- Connecting Power Apps and Power Automate directly to Dataverse
- Brief overview of Power BI for reporting and visualizing data from Dataverse

04 Module 4: Extending Power Platform & Next Steps

- Introduction to Power Virtual Agents: Creating a basic conversational chatbot
- High-level overview of AI Builder capabilities (form processing, object detection)
- Strategies for Power Platform governance, environments, and deployment best practices
- Pathways for further learning, advanced Power Platform certifications (e.g., PL-900, PL-100), and career development

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Power Platform Business Analyst**
- > **Citizen Developer Lead**
- > **Solutions Integrator (Microsoft Ecosystem)**

FREQUENTLY ASKED QUESTIONS

Q: Given the 2-hour duration, what specific Microsoft Power Platform certification does this course primarily prepare me for, and what are the direct career advantages of obtaining it?

This accelerated course is primarily designed to provide a strong foundational understanding for individuals aiming for the Microsoft Certified: Power Platform Fundamentals (PL-900) certification. Completing this course and pursuing the PL-900 certification will validate your understanding of the Power Platform's business value and product capabilities, making you a more attractive candidate for roles focused on business application development, process automation, and data analytics within the Microsoft ecosystem.

Q: Is prior experience with programming or database management a strict prerequisite for this intermediate-level course, or can individuals with a strong business background successfully engage with the content?

While some familiarity with Microsoft 365 services or basic data concepts is beneficial, prior programming or extensive database management experience is not a strict prerequisite. This course is specifically tailored for intermediate learners, including business professionals, analysts, and project managers, who have a strong business background and a desire to learn how to leverage low-code/no-code tools to solve business challenges. We focus on practical application and the intuitive interfaces of the Power Platform.

Q: Beyond theoretical understanding, what practical, hands-on skills in Power Apps or Power Automate will I gain that I can immediately apply in my job after completing this accelerated training?

Upon completing this 2-hour training, you will gain practical, hands-on experience in building a simple Canvas App to collect or display data, and creating a basic automated cloud flow in Power Automate (e.g., for notifications or approvals). You'll also understand how to connect these solutions to data sources like Dataverse. These skills enable you to immediately begin prototyping solutions, automating repetitive tasks, and contributing to smaller digital transformation initiatives within your current role.
