COURSE OVERVIEW

This concise 2-hour practice course is meticulously designed to solidify your understanding and readiness for the Microsoft MS-100: Microsoft 365 Identity and Services exam. It provides a targeted approach, focusing exclusively on high-quality practice questions that mirror the structure, difficulty, and scope of the actual certification exam. Through these practice scenarios, you will reinforce your knowledge of core Microsoft 365 identity solutions, including Azure Active Directory (now Microsoft Entra ID), user and group management, directory synchronization, authentication methods, and conditional access policies. You will also gain practical insights into planning and managing Microsoft 365 services and workloads, ensuring a holistic understanding of the Enterprise Administrator Expert role.

By engaging with these specialized practice questions, you'll not only identify knowledge gaps but also master the critical thinking and problem-solving skills required for success. This course is an invaluable tool for IT professionals aiming to achieve the Microsoft 365 Certified: Enterprise Administrator Expert certification, offering a strategic advantage in exam preparation. The benefits extend beyond certification, equipping you with robust, real-world skills to efficiently design, implement, manage, and troubleshoot identity and service components within a Microsoft 365 environment, directly impacting your ability to contribute to secure and productive digital workplaces.

Duration	2 hours
Level	Intermediate
Vendor	Microsoft
Exam Code	MS-100

COURSE CURRICULUM

01 Module 1: Microsoft 365 Tenant and Subscription Management Practice

- Planning Microsoft 365 deployment strategies
- Managing organizational settings and service health
- Subscription and licensing management scenarios
- Configuring data residency and compliance features

02 Module 2: Identity Management Practice with Microsoft Entra ID

- Implementing and managing user and group identities
- Practice with directory synchronization (Azure AD Connect)
- Managing password policies and self-service password reset
- Configuring external access and B2B collaboration

Graduates of this program are prepared for the following roles:

- > **Microsoft 365 Administrator (Specializing in Identity & Access Management)**
- > **Cloud Systems Engineer (Microsoft 365 Focus)**
- > **IT Infrastructure Specialist (Microsoft 365 Services & Deployment)**

FREQUENTLY ASKED QUESTIONS

Q: How does this 'Practice Questions' course specifically prepare me for the official MS-100: Microsoft 365 Identity and Services exam?

This course is entirely focused on exam readiness. It provides a curated set of practice questions designed to simulate the format, types, and difficulty level of the actual MS-100 certification exam. By working through these questions, you will identify your strengths and weaknesses in each exam objective, become familiar with the question styles, practice time management, and build confidence, significantly increasing your chances of passing the official exam on your first attempt.

Q: What are the recommended prerequisites or foundational knowledge needed before enrolling in this MS-100 Practice Questions course?

While this course is for practice, it assumes a foundational understanding of Microsoft 365 services and basic IT administration concepts. It is highly recommended that you have either completed the MS-900: Microsoft 365 Fundamentals certification, have practical experience administering Microsoft 365, or have studied the core concepts of identity, services, and tenant management relevant to MS-100 before taking this practice course. This will allow you to leverage the practice questions most effectively for assessment and reinforcement.

Q: Beyond passing the MS-100 exam, what practical, real-world skills will I solidify by mastering the concepts covered in these practice questions?

Mastering the concepts through these practice questions translates directly into critical real-world administrative skills. You will solidify your ability to design and implement robust identity solutions using Microsoft Entra ID, manage user authentication and access securely, troubleshoot common identity synchronization issues, and effectively provision and manage key Microsoft 365 services like Exchange Online, SharePoint Online, and Teams. These skills are essential for maintaining a secure, efficient, and compliant Microsoft 365 environment in any organization.
