COURSE OVERVIEW

This intensive 2-hour practice question course, 'MS-101: Microsoft 365 Mobility and Security — Practice Questions,' is meticulously designed to solidify your understanding and readiness for the official Microsoft 365 Mobility and Security exam. It delves deep into crucial aspects of managing enterprise devices, securing data, and implementing robust identity and compliance solutions within the Microsoft 365 ecosystem. Through a series of carefully crafted practice questions, you'll engage with scenarios covering Microsoft Intune, Azure Active Directory, Microsoft Defender for Endpoint, and data loss prevention strategies, preparing you to tackle complex real-world challenges.

By engaging with these practice questions, you will not only reinforce your theoretical knowledge but also develop practical problem-solving skills essential for deploying and managing secure, mobile Microsoft 365 environments. This course is an invaluable resource for IT professionals aiming to achieve the Microsoft 365 Certified: Enterprise Administrator Expert certification, offering a strategic approach to mastering mobility and security concepts. It ensures you are well-prepared to protect corporate data, manage devices efficiently, and enforce compliance policies, ultimately enhancing your ability to contribute to a secure and productive modern workplace.

Duration	2 hours
Level	Intermediate
Vendor	Microsoft
Exam Code	MS-101

COURSE CURRICULUM

01 Module 1: Implementing Mobile Device and Application Management

- Configuring device compliance policies in Microsoft Intune
- Managing mobile device enrollment and inventory
- Implementing Mobile Application Management (MAM) policies for data protection
- Deploying and managing apps with Microsoft Intune

02 Module 2: Implementing Advanced Threat Protection and Information Protection

- Configuring Microsoft Defender for Endpoint components
- Managing device security policies and baselines
- Implementing Azure Information Protection (AIP) for data classification and labeling
- Applying Data Loss Prevention (DLP) policies across Microsoft 365 services

03 Module 3: Managing Identity and Access

- Implementing Azure AD Identity Protection for user and sign-in risk policies
- Configuring conditional access policies for device and application access
- Managing multi-factor authentication (MFA) and self-service password reset (SSPR)
- Troubleshooting identity synchronization and access issues

04 Module 4: Managing Data Governance and Compliance

- Implementing retention policies and labels
- Configuring eDiscovery and content search for compliance
- Managing communication compliance policies
- Auditing and reporting on compliance activities

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Microsoft 365 Security Administrator**
- > **Modern Desktop Administrator**
- > **Enterprise Mobility Engineer**

FREQUENTLY ASKED QUESTIONS

Q: How do these practice questions specifically prepare me for the MS-101 exam's scenario-based questions?

Our MS-101 practice questions are designed with a strong emphasis on real-world scenarios, mirroring the structure and complexity of the actual exam's case studies. You'll encounter questions that require you to analyze given situations, choose the most effective Microsoft 365 security and mobility solutions, and justify your choices, thus honing your critical thinking and application skills for the live exam.

Q: What foundational knowledge or experience is recommended before taking this MS-101 Practice Questions course?

To maximize your benefit from this practice questions course, it is highly recommended that you have a solid understanding of core Microsoft 365 services, particularly Azure AD, Exchange Online, SharePoint Online, and basic networking concepts. Prior experience with administering Microsoft 365 environments or having completed a foundational course on Microsoft 365 administration (like MS-900 or MS-100) will be extremely beneficial.

Q: Beyond exam preparation, what practical skills will I develop by completing these MS-101 practice questions that are applicable in a real-world IT environment?

Completing these practice questions will significantly enhance your practical skills in designing, implementing, and managing robust security and mobility solutions within Microsoft 365. You'll gain a deeper understanding of how to configure Intune for device and app management, implement data loss prevention policies, enforce compliance, and utilize Azure AD Identity Protection, making you more effective in securing modern workplaces and protecting corporate data.
