COURSE OVERVIEW

This specialized practice questions course for the Microsoft Power Platform App Maker (PL-100) certification is meticulously designed to equip aspiring citizen developers and business analysts with the critical knowledge and problem-solving skills needed to excel in the official exam. Focused on practical application, participants will engage with a comprehensive set of practice questions covering key domains such as designing business solutions, analyzing and visualizing data, creating robust business solutions with Power Apps and Power Automate, and effectively implementing and managing these solutions.

By simulating the actual exam environment, this course provides an invaluable opportunity to solidify your understanding of the Power Platform's capabilities, including Power Apps, Power Automate, Dataverse, and Power BI. Successful completion and subsequent certification demonstrate your proficiency in building low-code solutions that streamline business processes and enhance operational efficiency, making you a highly sought-after professional in today's data-driven landscape. This course is your strategic stepping stone to validating your expertise and advancing your career in digital transformation.

Duration	2 hours
Level	Intermediate
Vendor	Microsoft
Exam Code	PL-100

COURSE CURRICULUM

01 Module 1: Designing Business Solutions - Practice Set

- Identifying and evaluating business problems
- Mapping processes and data models for Power Platform
- Designing user interfaces and experiences with Power Apps principles
- Planning solution components and security roles within Power Platform

02 Module 2: Analyzing and Visualizing Data - Practice Set

- Connecting to data sources relevant to Power Platform solutions
- Preparing and transforming data for use in Power Apps and Power BI
- Creating basic reports and dashboards using Power BI concepts
- Interpreting data insights to inform solution design and improvements

03 Module 3: Creating Business Solutions with Power Apps - Practice Set

- Building Canvas Apps from various data sources (SharePoint, Excel, Dataverse)
- Working with controls, formulas (Power Fx), and expressions in Canvas Apps
- Developing Model-driven Apps and custom Dataverse tables
- Implementing custom connectors and reusable components

04 Module 4: Automating Business Processes with Power Automate - Practice Set

- Designing and creating cloud flows for automated workflows
- Developing instant, scheduled, and UI flows (RPA basics)
- Implementing approvals, conditional logic, and looping actions
- Integrating Power Automate with other services and data sources

05 Module 5: Implementing and Managing Solutions - Practice Set

- Deploying solutions across different Power Platform environments
- Monitoring solution performance and troubleshooting common errors
- Managing user access and permissions for apps and flows
- Applying Application Lifecycle Management (ALM) principles for Power Platform solutions

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Certified Power Platform App Maker**
- > **Business Process Automation Specialist**
- > **Low-Code Application Developer**

FREQUENTLY ASKED QUESTIONS

Q: Who is this PL-100 Practice Questions course best suited for, and what are the recommended prerequisites?

This course is ideal for aspiring or current business analysts, departmental subject matter experts, and IT professionals who wish to validate their skills in building low-code solutions using the Microsoft Power Platform. While there are no strict official prerequisites for the PL-100 exam, we recommend participants have a foundational understanding of business processes, data concepts, and some basic exposure to Microsoft 365 services or Power Platform components to maximize their learning from these practice questions.

Q: How will this 'Practice Questions' course specifically help me prepare for the official PL-100 certification exam?

This course is specifically designed to simulate the format and challenge of the official PL-100 exam. You will work through a curated collection of exam-style questions covering all objective domains of the certification, including solution design, data analysis, Power Apps development, Power Automate flows, and solution management. Each question is accompanied by detailed explanations, helping you understand not just the correct answer, but also the underlying concepts and why other options are incorrect, effectively bridging knowledge gaps and boosting your exam confidence.

Q: Beyond passing the PL-100 exam, what practical skills will I refine through these practice questions that are immediately applicable in a professional setting?

Beyond exam preparation, this course sharpens your ability to critically evaluate business requirements and translate them into effective low-code solutions. You'll gain practical experience in identifying optimal Power Platform components for specific scenarios, troubleshooting common development challenges, and making informed design decisions that lead to scalable and efficient applications. This refined problem-solving approach is crucial for anyone looking to drive digital transformation initiatives within their organization as an App Maker.
