COURSE OVERVIEW

The PMI Agile Certified Practitioner (PMI-ACP) certification is a globally recognized credential designed for professionals who work on agile teams or organizations employing agile practices. This intermediate-level course, spanning 35 intensive hours, delves deep into the core principles, practices, tools, and techniques across a spectrum of agile methodologies, including Scrum, Kanban, Lean, Extreme Programming (XP), and Test-Driven Development (TDD). Participants will gain a comprehensive understanding of agile frameworks, value-driven delivery, stakeholder engagement, team performance, adaptive planning, problem detection and resolution, and continuous improvement, preparing them to effectively lead and contribute to agile projects.

Completing this certification course demonstrates your professional agility and readiness to embrace the evolving demands of project management. You will acquire practical skills in agile estimation, planning, monitoring, and adapting to change, crucial for delivering successful outcomes in fast-paced environments. Beyond mastering the theoretical foundations required to pass the PMI-ACP exam, you will learn how to apply agile principles to foster collaboration, enhance communication, and accelerate product delivery within your organization. This course empowers you to navigate complex project landscapes with confidence and expertise.

The professional benefits of achieving PMI-ACP certification are substantial. It validates your expertise in agile practices, setting you apart as a versatile and knowledgeable professional capable of driving agile transformations. This credential opens doors to advanced career opportunities, positions you as a leader in agile project environments, and equips you with the tools to improve project efficiency, predictability, and success rates. You will become a valuable asset in organizations seeking to adopt or enhance their agile capabilities, fostering innovation and delivering superior value.

Duration	35 hours
Level	Intermediate
Vendor	PMI
Exam Code	PMI-ACP

COURSE CURRICULUM

01 Module 1: Agile Foundations and Mindset

- Agile Manifesto: Values and Principles
- Key Agile Methodologies: Scrum, Kanban, Lean, XP
- Agile Principles: Adaptive Planning, Iterative Development, Time-boxing
- Servant Leadership and Facilitation
- Agile Team Roles and Responsibilities

02 Module 2: Value-Driven Delivery & Stakeholder Engagement

- Product Vision and Roadmapping
- Creating and Prioritizing Backlogs (User Stories, Epics)
- Release Planning and Iteration Goals
- Estimating and Sizing (Story Points, Planning Poker)
- Stakeholder Communication and Collaboration
- Customer Value and Feedback Loops

03 Module 3: Team Performance & Adaptive Planning

- Building High-Performing Agile Teams
- Motivation, Conflict Resolution, and Coaching
- Agile Monitoring: Burndown/Burnup Charts, Velocity
- Risk Management in Agile Projects
- Problem Solving and Conflict Resolution Techniques
- Adaptive and Iterative Planning Techniques

04 Module 4: Continuous Improvement & Professional Responsibility

- Retrospectives and Lessons Learned
- Continuous Integration and Continuous Delivery (CI/CD) Overview
- Test-Driven Development (TDD) and Behavior-Driven Development (BDD) Concepts
- Agile Metrics and Reporting
- Organizational Process Improvement
- PMI-ACP Exam Content Review and Strategies

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Agile Project Manager**
- > **Certified Scrum Master / Agile Lead**
- > **Associate Agile Coach / Agile Transformation Specialist**

FREQUENTLY ASKED QUESTIONS

Q: What are the eligibility requirements for the PMI-ACP certification exam after completing this 35-hour course?

To be eligible for the PMI-ACP exam, candidates must meet specific requirements set by PMI. In addition to completing this 35-hour agile education course, you'll need 2,000 hours of general project experience working on project teams within the last 5 years, AND 1,500 hours of experience working on agile project teams within the last 3 years. The 1,500 agile hours are in addition to the 2,000 general project experience hours.

Q: How does the PMI-ACP certification enhance my career beyond entry-level Scrum Master or Product Owner certifications?

The PMI-ACP distinguishes itself by validating a broader and deeper understanding of agile principles and practices across multiple methodologies, not just a single framework like Scrum. While Scrum Master or Product Owner certifications focus on specific roles, the PMI-ACP demonstrates your comprehensive knowledge to lead, implement, and adapt agile approaches in diverse project environments. This positions you for more senior roles such as Agile Project Manager, Agile Coach, or Agile Transformation Specialist, enabling you to drive organizational agility and influence strategic decisions.

Q: Will this course cover advanced agile estimation techniques or scaling agile practices for enterprise-level projects?

Yes, this course will cover various advanced agile estimation techniques, including Story Point estimation, Planning Poker, and other relative sizing methods, equipping you with practical skills to plan and forecast effectively in agile projects. While the PMI-ACP focuses on team-level agility, we will introduce foundational concepts of scaling agile frameworks and

discuss how core PMI-ACP principles apply to larger enterprise environments, providing a strong basis for further exploration into specific scaling frameworks like SAFe or LeSS.

ABOUT COMPUTER PRIDE

East Africa's Premier IT Training Center

With over 15 years of excellence, Computer Pride delivers globally recognized certification programs from leading technology vendors. Located on Kenyatta Avenue in Nairobi's CBD, our state-of-the-art facilities and expert instructors have empowered thousands of professionals across East Africa.
