COURSE OVERVIEW

The PMP: Project Management Professional certification is globally recognized as the gold standard for project management excellence. This advanced 35-hour course, aligned with the latest PMI standards and the PMBOK Guide, empowers experienced project managers to master the critical skills needed to lead diverse projects to successful completion. You will delve into the full project lifecycle across predictive, agile, and hybrid methodologies, learning to effectively manage people, processes, and the business environment. This intensive training covers advanced techniques in risk management, strategic planning, stakeholder engagement, and value delivery, ensuring you are equipped to tackle complex challenges.

Earning your PMP certification from Computer Pride signifies your commitment to professional growth and demonstrates a proven capability in leading and directing projects. Beyond mere theoretical knowledge, this course hones your leadership qualities, decision-making abilities, and capacity to drive organizational change. Graduates emerge with a profound understanding of best practices, an enhanced ability to optimize project outcomes, and the strategic foresight to align projects with broader business objectives, ultimately accelerating career progression and increasing earning potential in a competitive global market.

Duration	35 hours

- > **Senior Project Manager (leading complex, high-budget, or strategic initiatives)**
- > **Program Manager (overseeing multiple related projects to achieve strategic goals)**
- > **Project Management Consultant (advising organizations on PM best practices and strategy)**

FREQUENTLY ASKED QUESTIONS

Q: How does this PMP certification specifically address the increasing demand for Agile and hybrid project management skills in today's dynamic market?

The PMP exam content outline, updated in 2021, dedicates a significant portion to adaptive methodologies. This Computer Pride course thoroughly covers agile principles, Scrum, Kanban, and hybrid project approaches, ensuring you can confidently lead projects in predictive, agile, and hybrid environments. It equips you to select and tailor the most appropriate method for any project scenario, making you a versatile and highly sought-after project leader capable of navigating complex and evolving project landscapes.

Q: What are the eligibility requirements to sit for the PMP exam, and how does this course prepare me to meet them?

To sit for the PMP exam, you need either a four-year degree with 36 months of leading projects and 35 hours of project management education, OR a high school diploma/associate's degree with 60 months of leading projects and 35 hours of

project management education. This Computer Pride PMP course provides the mandatory 35 contact hours of project management education, delivered by PMI-certified instructors, specifically designed to cover the full spectrum of PMP exam objectives and validate your eligibility for the certification application process.

Q: Beyond passing the exam, what practical, real-world skills will I gain from this PMP course that I can immediately apply in my current or future project management role?

This PMP course goes beyond theoretical knowledge, focusing on practical application and the development of advanced leadership competencies. You will gain hands-on skills in strategic project planning, sophisticated stakeholder engagement, robust risk management, effective conflict resolution, and the ability to adapt project methodologies (predictive, agile, hybrid) to diverse situations. You'll learn to lead diverse teams, optimize project performance, make data-driven decisions, and ensure projects consistently deliver tangible business value, directly enhancing your ability to successfully manage complex projects from initiation to closure.
