COURSE OVERVIEW

The Portfolio Project Management Professional Course, offered by Computer Pride in collaboration with PMI, is an intensive 40-hour program designed for experienced project and program managers looking to elevate their careers to a strategic level. This intermediate-level course dives deep into the principles and practices of effective portfolio management, equipping you with the skills to align projects and programs with organizational strategy, optimize resource allocation, and maximize value delivery. You will learn to establish and mature an organizational portfolio management framework, ensuring that the right projects are selected, prioritized, and executed to achieve business objectives.

Through practical case studies and real-world scenarios, participants will master the governance processes, performance management techniques, and strategic communication vital for successful portfolio oversight. This certification is crucial for professionals aiming to transcend operational management and contribute directly to an organization's strategic success and competitive advantage. Graduates will be prepared to lead strategic initiatives, drive organizational change, and become key decision-makers in their respective industries, fostering a culture of strategic investment and continuous improvement within their enterprises.

Duration	40 hours

- > **Director of Strategic Initiatives**
- > **Portfolio Manager**

FREQUENTLY ASKED QUESTIONS

Q: How does the Portfolio Project Management Professional Course differ from PMP or PgMP certifications?

While PMP focuses on managing individual projects and PgMP on managing related projects as a program, the Portfolio Project Management Professional Course elevates your expertise to a strategic level. It teaches you to manage a collection of projects, programs, and operations to achieve an organization's strategic objectives. This course is for professionals who need to make high-level decisions about which initiatives to fund and pursue, ensuring alignment with overall business strategy and maximizing value across the entire organization.

Q: What are the recommended prerequisites or experience levels for enrolling in this Portfolio Project Management course?

This intermediate-level course is designed for experienced professionals. While there aren't strict pre-certification requirements to enroll, it is highly recommended that participants have significant experience in project and/or program management. A strong understanding of project management principles, possibly evidenced by a PMP or PgMP certification, will be beneficial as this course builds upon those foundational competencies to address strategic portfolio oversight.

Q: What specific skills will I gain from this course that will help me influence strategic decisions in my organization?

This course will equip you with critical skills in strategic alignment, investment prioritization, advanced risk management at an enterprise level, and value optimization across a collection of initiatives. You will learn to develop robust governance frameworks, effectively communicate portfolio performance to executive stakeholders, and make data-driven decisions that directly impact organizational profitability and strategic goals, positioning you as a key strategic advisor rather than just an execution manager.
