COURSE OVERVIEW

The SAFe® Advanced Scrum Master (ASM) certification is designed for existing Scrum Masters who are ready to elevate their leadership capabilities within a Scaled Agile Framework (SAFe) environment. This advanced course goes beyond the fundamentals of Scrum, equipping you with the specialized knowledge and skills required to facilitate successful program execution, foster relentless improvement, and mentor high-performing Agile teams and Agile Release Trains (ARTs). You will delve into advanced topics such as applying Lean-Agile principles at scale, resolving systemic impediments, and coaching teams for optimal performance in a large-scale enterprise context.

By earning your SAFe® Advanced Scrum Master certification, you will gain the expertise to become a true change agent, guiding your teams and ARTs through complex challenges inherent in scaled agile transformations. This certification empowers you to significantly contribute to organizational agility, enhance value delivery, and cultivate a culture of continuous learning and improvement. It's an essential step for Scrum Masters aspiring to take on more significant leadership roles and influence the successful implementation of SAFe within their organizations.

Duration	16 hours
Level	Advanced
Vendor	Scaled Agile

PREREQUISITES

- Experience as a Scrum Master

COURSE CURRICULUM

01 Exploring the Advanced Scrum Master Role

- Understanding the SAFe Framework
- Scrum Master's role in SAFe beyond team-level Scrum
- Applying SAFe Lean-Agile Principles
- Servant leadership and coaching in a SAFe enterprise

02 Applying SAFe Principles and Practices

- Facilitating Program Increment (PI) Planning readiness
- Supporting PI Planning execution
- Executing the Program Increment
- Addressing impediments at scale

03 Facilitating ART Execution

- Synchronizing teams within the ART
- DevOps and Release on Demand enablement
- Continuous Delivery Pipeline
- Inspecting and Adapting the ART

04 Building High-Performing Teams

- Coaching teams for high performance
- Resolving team and ART conflicts
- Fostering technical agility and craftsmanship
- Promoting Communities of Practice

05 Improving ART Performance

- Driving relentless improvement
- Metrics for measuring flow and value
- Facilitating continuous learning and innovation
- Leading organizational change as an ASM

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Senior SAFe Scrum Master**
- > **Agile Coach (Team/ART Level)**
- > **SAFe Release Train Engineer (RTE) Aspirant**

FREQUENTLY ASKED QUESTIONS

Q: How does the SAFe® Advanced Scrum Master (ASM) certification differ from the foundational SAFe® Scrum Master (SSM) certification, and who is it intended for?

The SAFe® Advanced Scrum Master (ASM) certification builds upon the foundational knowledge gained from the SAFe® Scrum Master (SSM) course. While SSM focuses on implementing Scrum within a single team in a SAFe context, ASM delves into advanced concepts like facilitating ART execution, coaching multiple teams, resolving systemic impediments, and driving continuous improvement across the entire Agile Release Train. It's intended for experienced Scrum Masters, Team Leads, or Agile Coaches who have a working knowledge of Scrum and SAFe, and are looking to enhance their leadership skills to optimize flow and value delivery at scale.

Q: What specific challenges will an ASM certified professional be equipped to address in a large enterprise environment?

An ASM certified professional will be uniquely positioned to address challenges such as synchronizing multiple teams within an Agile Release Train (ART), resolving cross-team dependencies and impediments that impact program execution, fostering a culture of technical excellence and continuous delivery, and facilitating organizational change that supports scaled agile adoption. They will learn to apply advanced coaching techniques to guide teams through complex problems and help the ART achieve its strategic objectives, ultimately enhancing predictability and overall business value.

Q: What career progression opportunities are typically unlocked or enhanced by achieving the SAFe® Advanced Scrum Master (ASM) certification?

Achieving the SAFe® Advanced Scrum Master (ASM) certification significantly enhances career progression opportunities for professionals aiming for leadership roles within scaled agile environments. Beyond a Senior Scrum Master, this certification is a strong stepping stone towards becoming a SAFe Release Train Engineer (RTE), an Agile Coach focused on multiple teams or ARTs, or a Lean-Agile Leader contributing to enterprise-level transformations. It demonstrates a deep understanding of scaling agile principles and practices, making certified individuals highly valuable assets in organizations undergoing or maturing their SAFe implementations.

ABOUT COMPUTER PRIDE
