COURSE OVERVIEW

This specialized course, "SC-400: Administering Information Protection and Compliance in Microsoft 365 — Practice Questions," is expertly designed to solidify your understanding and readiness for the crucial Microsoft SC-400 certification exam. It focuses on practical application and in-depth review of core concepts related to information protection, data loss prevention, and information governance within the expansive Microsoft 365 ecosystem. By engaging with a comprehensive set of meticulously crafted practice questions, you will sharpen your analytical skills, reinforce your knowledge of Microsoft Purview solutions, and gain confidence in tackling the complexities of the official certification.

Participants will dive deep into critical technologies such as Azure Information Protection, Microsoft Purview Data Loss Prevention (DLP), information governance policies, records management, and eDiscovery. The professional benefit of this course extends beyond exam preparation; it equips IT professionals, security administrators, and compliance officers with the validated expertise to protect sensitive organizational data, ensure regulatory adherence, and mitigate insider risks effectively. Achieving the SC-400 certification demonstrates a robust skill set in managing digital compliance, making you an invaluable asset in any modern enterprise striving for secure and compliant operations.

Duration	2 hours
Level	Intermediate
Vendor	Microsoft
Exam Code	SC-400

COURSE CURRICULUM

01 Mastering Information Protection Concepts

- Creating and managing sensitivity labels and label policies
- Implementing and configuring Azure Information Protection unified labeling client
- Understanding data classification and protection strategies
- Practicing scenarios for applying and enforcing sensitivity labels

02 Advanced Data Loss Prevention (DLP) Practice

- Designing and implementing DLP policies for various workloads (Exchange, SharePoint, OneDrive, Teams, Endpoints)
- Configuring DLP rules, conditions, and actions
- Reviewing DLP alerts and incident management
- Simulating real-world DLP policy deployment and troubleshooting

03 Information Governance and Records Management Drills

- Implementing retention labels and policies for data lifecycle management
- Configuring adaptive scopes for retention
- Understanding records management principles and M365 archiving
- Practicing data disposition and event-based retention scenarios

04 Insider Risk and eDiscovery Simulation

- Setting up and managing Insider Risk Management policies
- Configuring communication compliance and ethical wall capabilities
- Performing eDiscovery searches and investigations
- Practicing legal hold and advanced eDiscovery workflows

CAREER PATHWAYS

Graduates of this program are prepared for the following roles:

- > **Microsoft 365 Compliance Administrator**
- > **Senior Information Protection Specialist**
- > **Data Governance & Risk Management Consultant (Microsoft Ecosystem)**

FREQUENTLY ASKED QUESTIONS

Q: How will this practice questions course specifically enhance my chances of passing the SC-400 exam?

This course is engineered to provide an authentic simulation of the SC-400 exam experience. By working through a wide array of meticulously curated practice questions, you'll not only identify knowledge gaps but also become familiar with the exam format, question types, and time management strategies. Each question is designed to test your understanding of critical Microsoft 365 information protection and compliance concepts, allowing you to refine your problem-solving skills and build confidence for the actual certification test.

Q: What prerequisite knowledge or experience is recommended before enrolling in this SC-400 practice questions course?

While this course focuses on practice questions, a foundational understanding of Microsoft 365 services, particularly Exchange Online, SharePoint Online, and Teams, is highly recommended. Participants should ideally have some experience with administrative tasks within a Microsoft 365 environment and a basic grasp of security and compliance concepts. This course is best suited for individuals who have already studied the core SC-400 topics and are looking to validate and solidify their knowledge.

Q: Beyond exam preparation, what practical skills will I gain or reinforce by completing these SC-400 practice questions?

This course goes beyond rote memorization, challenging you to apply your knowledge to realistic scenarios. You will reinforce practical skills in designing and implementing sensitivity labels, configuring Data Loss Prevention (DLP) policies across various Microsoft 365 services, managing information retention and records, and leveraging Microsoft Purview solutions for insider risk management and eDiscovery. These are critical skills for securing organizational data, ensuring regulatory compliance, and effectively managing information lifecycle in a modern cloud environment.
