03 Backend Development

- Server-side programming principles
- Database design and SQL
- Creating RESTful APIs
- Authentication and Security

04 Version Control & Deployment

- Git and GitHub workflow
- Collaborative development
- CI/CD basics
- Hosting and cloud deployment

FREQUENTLY ASKED QUESTIONS

Q: Do I need prior coding experience?

No, this course is designed for beginners. However, basic computer literacy and logical problem-solving skills are highly recommended.

Q: What languages will I learn?

You will learn core web technologies including HTML, CSS, JavaScript, and backend languages like Python or Node.js depending on the specific track.

Q: Are there practical projects?

Yes, the course is highly project-based. You will build several real-world applications to include in your portfolio by the end of the program.
